BENCHTOP WITH BASE

The OTSHC comes with a base that allows it to sit on top of a bench

DROPPED INTO A BENCH

The base can be removed and the unit can be dropped into a cutout in a bench

CONTROLLER BOX MOVEMENT

The controller box is connected to the unit via a 1.5 metre long cable which allows for the box to be installed into a bench as well as attached to the base.

Each OTSHC comes with a base with the controls installed into the base frame

With the base removed and the OTSHC dropped into a bench, the controls can be installed into the side of the bench

CONTROLLER BOX

The controller box features two sets of controls and switches so that the base level and shelf level can be controlled separately.
